

JK TECH

Your Solution Partner for Interior/Surfacing Materials

ABOUT JK TECH

JK TECH is a solution partner for whom are interested in acryl sink & basin, solid surface, quartz business, which are raw material, R&D, manufacturing, global marketing & sales.

OUR BUSINESS

Our company cares about every customer's needs and the future.
Our company cares for humans and environment.

PRODUCT INFO

Satisfaction guaranteed with the best quality and the lowest price!
We will provide you a highly standard product.

About JK Tech

JK TECH was established in 2007. After having more than 21 years of R&D, manufacturing, global marketing and sales experience of the Construction materials, Solid Surface and Quartz business at the LG Chemical, we as a global solution partner company, provide what customer needs at variety of levels.

We manufacture and supply acrylic adhesive, acrylic sinks&bowls and also trade Aluminum Trihydrate(ATH), Toner and PolyVinyl Acetate films(PVA) for solid surface manufacturing, craft paper, polishing tools, and a variety of raw materials for Quartz production. We also offer a service for those who need consulting in R&D, manufacturing, marketing and sales in Solid Surface and Quartz business.

We guarantee you the most reliable and dedicated service until you find our products and service satisfying. Contact/Visit us whenever you need our help.

CEO James Jung

Manufacturing & Supply

- Acrylic Solid Surface, Adhesive, Acrylic Sinks & Bowls

Distribution & Trading

- Acrylic Solid Surface & Quartz Surface
- Raw Materials & Accessories for Solid Surface and Quartz Surface
- Machines & Tools for fabrication of Solid Surface
- Interior Film & Deco Foil (PVC/PP sheet)
- Electronic Kitchen/Home Appliances

Consulting

- M&A, R&D, Manufacturing, Sales & Marketing

2022~

Awarded \$1 Million Export Tower 2022 of Trade Day
Launch new products; Solid surface, Interior film, Deco foil, Luxury vinyl tile(LVT)

2019

Acryl bowl supplier for LOTTE CHEM

2018

Acryl bowl supplier for LG Hausys

2017

Acryl basins supplier for Krion in Spain

2014

Expanding to global solution partner for solid surface & quartz business.

2012

Started a acrylic sink & bowl production.

2009-2011

Set up a "Uni-care" for medical trading company.

2008

started a sale in acrylic adhesive for Solid Surface and Quartz

Tip(250ml, 75ml, 50ml)

Advantages

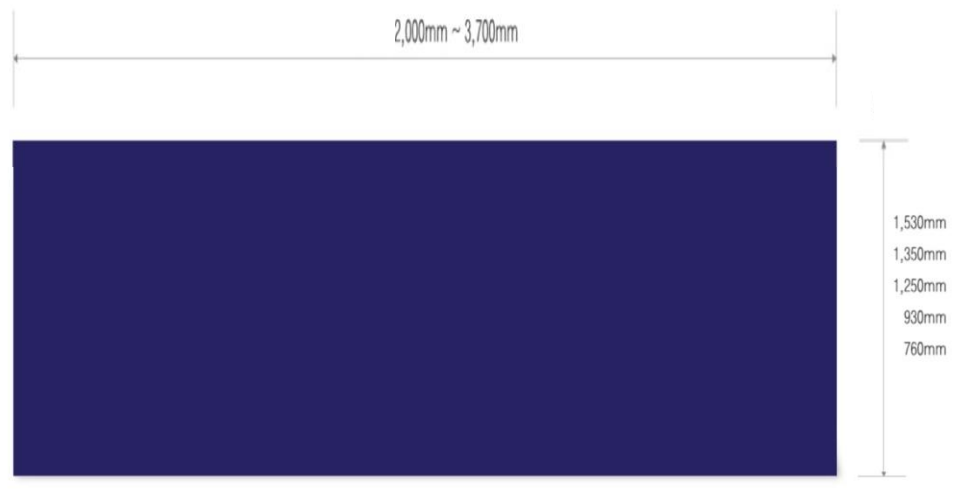

- High adhesive strength
- Invisible seams
- Variety of colors
- Long Shelf-Life(5years)
- UV stability
- Auto dispensing system
- Low TVOC

Physical Properties

Description	Property	Result
Component A	Appearance	Colored viscous liquid
	Viscosity	Refer to the thixotropy
	Density	1.1 - 1.2 g/cm ³
	Shelf-Life (at max. 25°C)	5years
Component B	Appearance	Clear viscous liquid
	Viscosity	500 - 550 cps
	Density	1.1 - 1.2 g/cm ³
	Shelf-Life (at max. 25°C)	5years
Joint Adhesive Ratio 10:1 of component A and B	Working Time (at 10°C - 30°C)	8 - 20 min.
	Fixture Time (at 10°C - 30°C)	15 - 40 min.
	Weather Test	Indoor UV stability
	Recommended Operating Temperature	10°C - 30°C
	Recommended Storage Temperature	13°C - 25°C

3. Specification (Acrylic Solid Surface)

JK Solid Surface

Thickness	20T, 12T, 6T, 9T, 4T
Width	760mm, 930mm, 1,250mm, 1,350mm, 1,530mm
Length	2,000mm ~ 3,700mm
Remarks	Broad Width, Thickness

Strengths of Broad Width Products

- Produced without adhesives, incorporated into island kitchen
- Applied to places 760mm tall such as the information desk, etc.
- 2-step counter
- Wall Panel: (Regular Size: 760mm) 1 + a (Broad Width: 930 – Regular Width: 760)
_ Information Desk, 2-step Counter, 9T products easily applied as wall panels
- Lengths varied to meet customer needs to reduce loss

- **Production of Special Size**
 - Thickness of 9mm can be produced on demand
 - Other special size needed to be discussed
- **Shipment and Payment Term**
 - Only container base (20ft recommended)
 - 100% T/T in advance before shipment
 - FOB Busan (Korea) or CIF Main Ports in EMEA Possible
- **MOQ**
 - 40 sheets for colors from the collection
 - Quantity for 20ft container for colors specially developed on demand.
 - About 20 pcs for each model for Sink/Bowl
- **Loading of Sink/Bowls & Adhesives**

Sink/Bowls and Adhesives are usually shipped together with Solid Surface Sheets. In case that 20ft container is used, there is left space about 2m x 2m after loading Solid Surface Sheets and Sink/Bowls & Adhesives can be loaded in this area.

KOMOTEK

Solid Surface Fabrication Machine Series

www.komo-tek.com

Komotek has been continued to develop thanks to its research and development in the imitation marbles field and continuous improvements, endless efforts to maintain accuracy of manufacturing technology, and the management philosophy of service for customer satisfaction, and has been recognized by the clients. Komotek Co., Ltd. would like to continue to be a imitation marble equipment brand that can be recognized not only in Korea but in the global market.

Artificial Stone Cut Saw

An equipment that cuts materials like MMA, UP, BMC into various sizes. Cuts up to 800 width and 100mm height, and the fastest cutting speed is 30 m/m per minute. Optimized cutting conditions for imitation marbles, the accuracy of tailoring, degrees of precision and vertical angle are very high. It uses one-touch saw replacement method that makes replacing the saws much easier and safer. Top press holds the product in place and the saw tailors it so the saw isn't in sight to lessen the accident rate and it's very efficient in filtering the dusts.

It can be used for multi-purpose since half-finished products like BMC can be cut.

CNC Sink Bowl Router

Equipment that processes materials such as MMA, UP, BMC, etc. to CNC 2D and 3D. This equipment is used mostly in perforating the holes for kitchen sinks that use imitation marbles. Also used for processing shapes for any kind that uses imitation marbles. Cuts up to 800 width and 100mm height, and the fastest cutting speed is about 3.5m per minute.

Optimized cutting conditions for imitation marbles, the material fixation is vacuum-clamping, and the air-ventilating hold is engineered so that it filters more than 99% of dust to make the processing environment more pleasant. Various sizes of hole sizes are pre-set to make the use easier, and anyone can use this interactive CNS controller after 30 minutes of training. It can be used for multi-purpose since half-finished products like BMC can be cut. All equipments of Komotek is optimized for imitation marble materials.

Solid Surface V-Grooving

A multiple tailoring and grooving equipment that makes V-grooves to fold imitation marble materials such as MMA, UP, BMC, etc. and also tailors the length. An equipment that cuts materials like MMA, UP, BMC into various sizes. Cutting and V-grooving up to 850 width and 20mm height, fastest cutting speed of 10 m/m per minute. Optimized cutting conditions for imitation marbles, the accuracy of tailoring, degrees of precision and vertical angle are very high.

Very efficient in filtering dust. Can be customized to various requirements. Various functions at the bottom of the equipment, such as dusting, automatic taping, and multi-blades.

Solid Surfaces Auto Feeder lift

Automatic feeding lift that feeds the imitation marble materials automatically.

When the raw materials are loaded in the palette and delivered and the materials in 800mm width x 3680 length x 700mm height (including the palette) about 3 tons in weight are put on the auto feeder by the forklift, the imitation marbles are fed one by one and lifted one by one according to the height of the feeds.

Solid Surface CNC All-in-one machine

An all-in-one sanding beveling machine that bevels the bond in the front, sides, back and left and right walls and punches the hole in the location where the sink ball gets inserted, after the tailoring and V-grooving of the top plate of kitchen sink. All programs are in interactive system that automatically processes the materials by the exterior size and control of selected functions. All-in-one CNC sanding machine used for top plates of kitchen sinks for apartments.

Artificial marble kitchen sink sanding processing line

A sanding machine that makes 550~750 wide top plates of sinks by sanding the front and sides, water holes of the front apron, the sills in the back and the left and right, and adjusting the width with the measurement controller, after the tailoring and V-grooving of the top plates of imitation marble kitchen sinks. Sanding line applicable to mass production system.

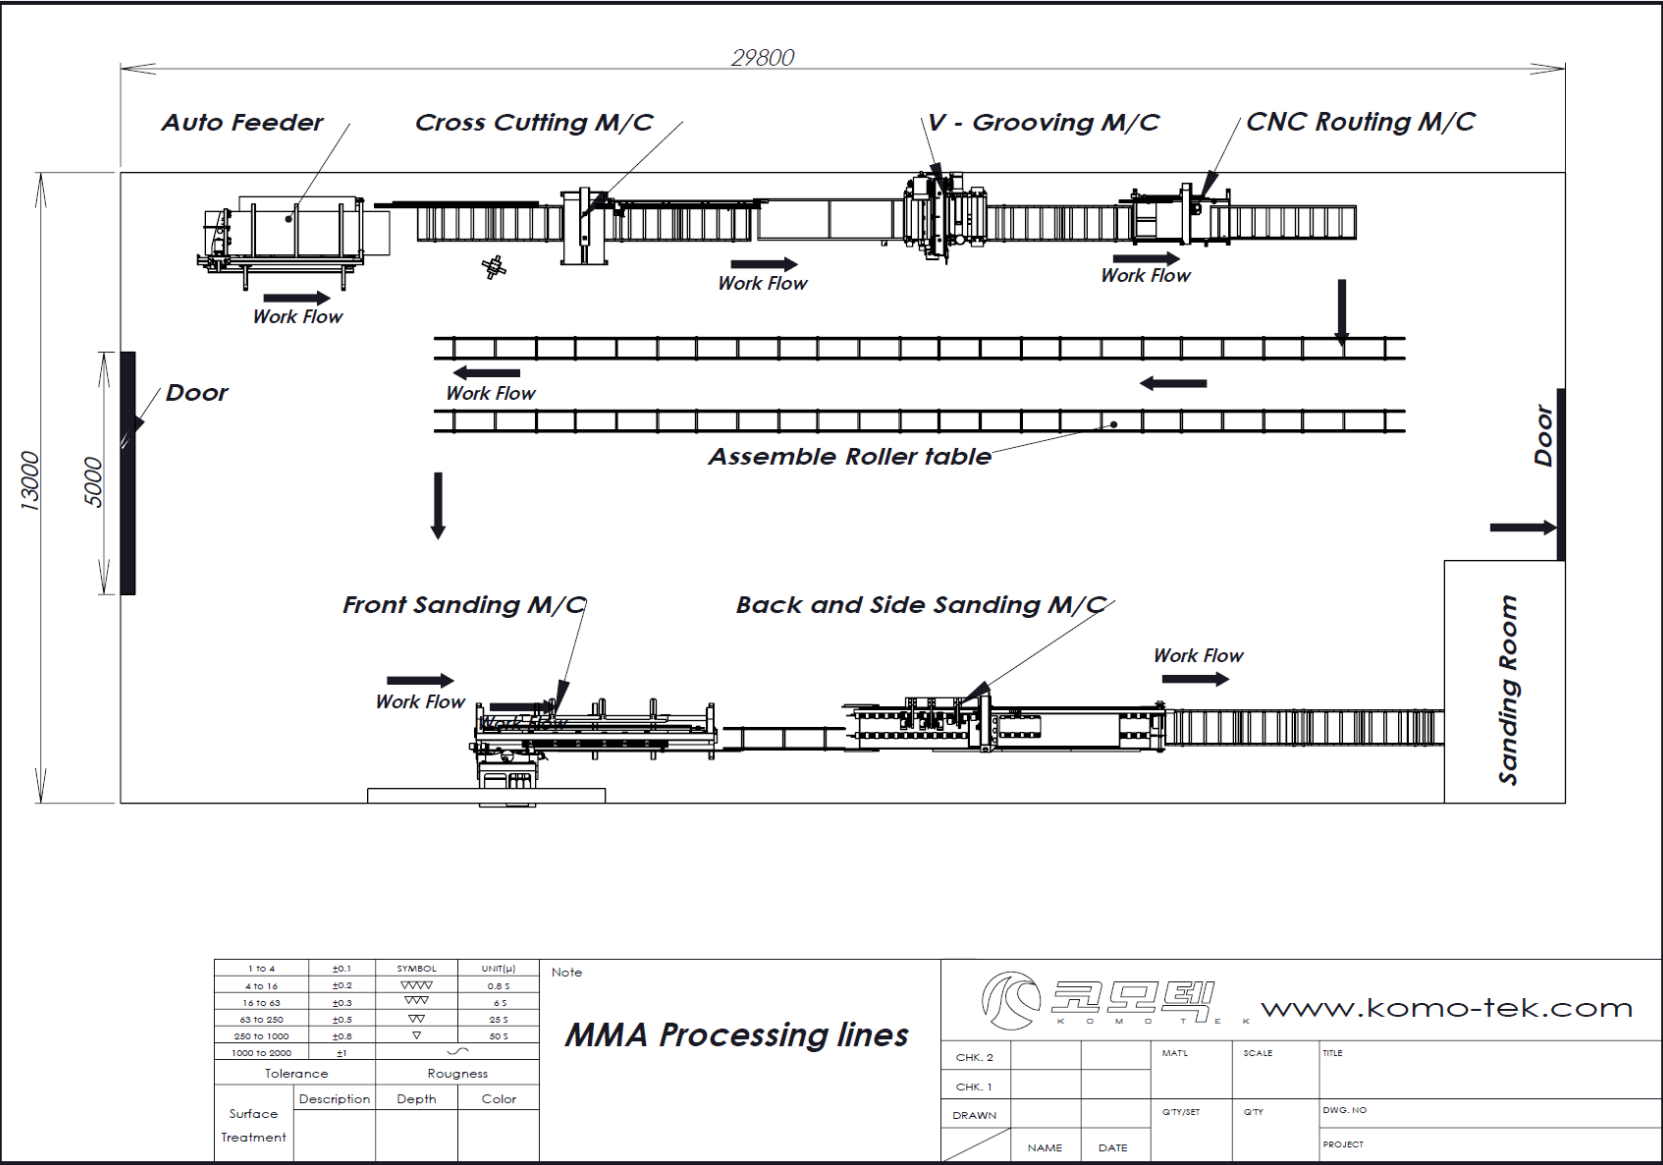

Solid Surfaces CNC 3D Machine

CNC equipment that works on 2D process to make casts before working on imitation marble molding or 3D process after molding or gluing of imitation marbles.

SOIF Interior Film

Interior Film (Architectural Film) – Self Adhesive Film

SAMSUNG INTERIOR FILM CO., LTD

<http://www.samsungfilm.co.kr>

JK Tech. Co., Ltd

- SOIF Official Distribution Partner

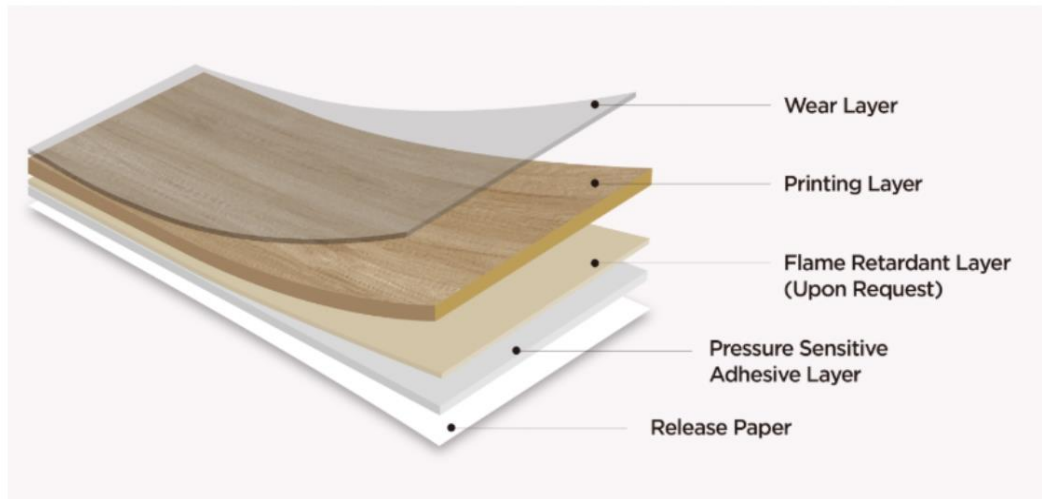

SOFT
ORIGINAL
INTERIOR
FILM

Where there is ART there is SOIF

ABOUT INTERIOR FILM

Interior Film is decorative architectural films with pressure sensitive adhesive (a self-adhesive decorative films) with excellent design quality, durability, and water resistance. With a rich variety, Soif Interior Film has been used more than a decade in a variety of applications around the world, ranging from interior of buildings to fittings, furniture, wall panels

1. Efficiency

Compared with existing surface finishes, installation is easier, which reduces work schedules. The precision of the work is improved. It is also efficient as it can be easily changed if it needs to be changed or repaired.

2. Design originality

Natural wood grain type and More.

It is possible to produce various colors, Patterns and surface textures such as high-quality metal type, leather and suede texture type.

3. Convenience

Excellent adhesion due to special adhesive treatment for applying on flat and curved surfaces.

4. Durability

Excellent durability against impact, friction, and scratches. Excellent dimension stability against changes in heat, temperature and humidity, and contamination resistance from solvents and chemicals.

5. Excellent flame retardancy & safety

It is a product that passed strict fire-prevention inspection of the KOREA FIRE INSTITUTE.

1. Introduction

SOIF Interior Film

ECO-FRIENDLY SOIF

INDOOR BUILDING MATERIALS TESTED

Building materials for indoor use is granted. (Formaldehyde, toluene and volatile organic compounds TVOC, etc. Test three kinds of emissions to determine their suitability.)

ANTI-BACTERIA FILM

Anti-bacteria safety solutions

A more comfortable and safe space with a soif antimicrobial safety solution can be directed (check out the Soif Anti-bacteria logo family, which is certified for antimicrobial performance)

장기도록영양물소재업

Selected as a promising enterprise in South Korea

For more than 10 years, we have been a companion for community and social development. Maintaining sustainable management, we understand our most valuable assets are our people, that's why we have focused heavily on development and maintenance programs for our employees.

Eco-friendly SOIF

Soif interior film is an eco-friendly surface finish material that has passed various tests. Its natural composition, along with our wide range of designs, makes us the leading provider in Eco Friendly, Sustainable Film.

BESPOKE LANTERN DESIGNS

Samsung Film has developed its own design and has a unique lantern design. In 2020, we were certified as an excellent company in technology evaluation.

Excellent Flame-retardant performance & safety

This product has passed the strict flame-retardant test of the Fire Industry Institute of Technology. (Korea) Excellent flame-retardant performance and stability protects you and your property.

Flame-retardant & Eco-Certified from Spain

It is a fire and eco-friendly certification related to Spain building materials. SOIF products are gas-free, formaldehyde and eco-friendly building materials Tested and verified for safety. (ENAC Verification Number 2019AN3043)

DECORIA Luxury Vinyl Tiles (LVT)

The prestigious luxury vinyl floor

DECORIA

The Prestigious name of luxury vinyl floor from Korea

DAEJIN is the first company introduced Luxury Vinyl Tile in Korea, and is supplying newly developed eco-friendly products to world customers. Our international activities cover all around the world including USA, Europe and many other countries you know, by providing Loose-lay tiles which can be installed without adhesive and anti-scratch durable UV products to overseas market. We will continue our efforts and challenges to fulfill customer satisfaction.

Merits of DECORIA Tiles

High Density PU Coating

Im proved PU coating enhances protection from scratches, and assures comparably longer life times.

Eco-friendly Material

Products made with recycled material improves environmental protection. Virgin product is also available upon customer's request.

Glass Fiber Sheet

Additional glass fiber layer can improve dimensional stability by minimizing shrinkage and expansion of product.

Various Color / Pattern Design Collection

Various colors and patterns with more than 500 of selection allows you find most suitable design for your flooring.

Glueless Installation

Non-slip of assembly technology allows easy installation with no use of adhesive.

Certificates

- EPA Certificate (United States Environmental Protection Agency)
- Floor Score
- KS Certificate (Korea Standards Association)
- Quality Management System (GERMAN CERT)
- Environmental Management System (GERMAN CERT)

Specific Measurements of DECORIA

Type & Composition	Type & Composition PVC Laminated Floor Covering
Application	Application Commercial, Residential
Surface Treatment	Surface Treatment PU & Anti-bacterial, Per design
Profile	Profile Beveled / Non-beveled, Per design
Tile Size(mm)	470 x 470, 184 x 950
Total Thickness(mm)	3.0
Wear Layer Thickness (mm)	0.3 0.5 0.7
Fire Rating	EN 13501-1 Bfl - S1
Heat Stability	KSM 3802
Slip Resistance	BS 7976-2
Residual Indentation	EN ISO 24343-1 (EN 433)
Color Fastness	ISO 105-B02
Dimensional Stability	ISO 23999 (EN 434)
Flexibility	EN 435
Electrical Behavior	EN 1081

PASECO Electronic Appliances

Electronic Kitchen & Home Appliances

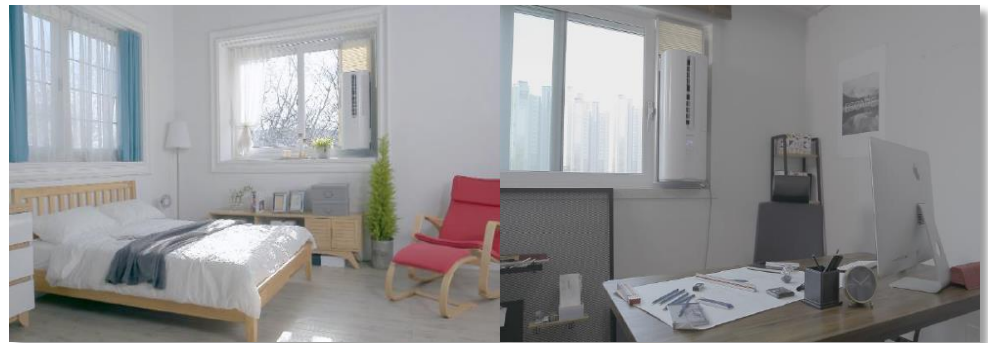

1. Dual Inverter Window Air Conditioner

PASECO Electronic Appliances

Dual (Twin) Inverter
PWA-3300W

Rated voltage	220V~, 60Hz (50Hz)
Power Consumption	725W
Product Size	330*277*855mm (W*D*H)
Product weight	20.5Kg (N.W)
Cooling capacity	2,350 (19m ²)
Dehumidifying Capacity	32.2 (L/Day) (by KTC)
Temperature setting	18~30°C
Noise Level (Sleeping mode)	37.1 (by KTC)
Reservation time	1~12hr
Drainage system	Self-evaporating system
Refrigerant	410A
Compressor	LG Dual (Twin) Inverter Compressor

Dual Inverter Window Air Conditioner

PASECO Electronic Appliances

Wide air conditioning up to 120°

Daily 32.2L dehumidification Capability

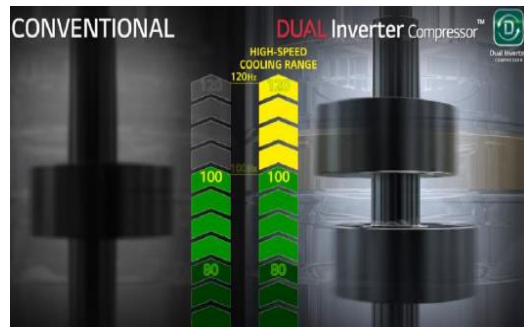

Noise Test: 37.1dB

Windows open Windows closed Window lock available

Unobtrusive clean back

Fast Cooling Technology

Self-evaporation

01 Tighten the bolts to secure the installation kit. 02 Mount the installation kit on the window. 03 Install the air conditioner in the installation kit

Easy Installation by anyone

Front Side

Back side

One-piece type
(no requirement of outdoor unit)

Installed to the height of the window

01 Built-in

Premium induction cooktop | Hybrid Cooktop | Electric cooktop | Gas cooktop | Hood | Rice refrigerator | Dish cloth cutting board sterilizer | Dishwasher | Dish dryer | Bidet | Food spin-dryer | Laundry drying rack

02 Kitchen

Kimchi refrigerator with freezer | Gas stove | Non-installation dishwasher | Electric grill | Cutting board sterilizer

03 Living

Body dryer | Clothes care appliance | Mini washing machine

04 Cool

Window-type air conditioner | Circulator | Fan | Industrial fan | Mosquito trap

SHINHO Deco Foil (sheet)

PVC/PP/PET Deco sheet and Flooring sheet

ECOTECTURE

LVS

The beginning and the end of décor sheet manufacturing is
Different when SHINHO makes it

SHINHO

The sheets laminating produced through specialized integrated production system of SHINHO INDUSTRY

ECOTEC

Exported to many countries, it is manufactured by the calender line - the latest automation equipment – having smooth surface, gloss, dimensional stability, and excellent gravure property for decorating. It is used for high-grade deco sheet, building materials, and interior sheet which requires delicate color expressions.

ECOTECHURE

LVS

With SOUNDPROTEC noise prevention technology, the LVS provides a comfortable walk with noise absorption. LVS, which can be built in every space of the house, from frequent walking or humid spaces, provides a durable floor with a similar appearance to natural materials. Experience LVS with practical durability to fit in with sophisticated space production.

ECOTECHTURE

2D Foil

2D foil

For interior doors, furniture components, door frames, floor boards, or window boards, our special thermoplastic 2D foils can be used. With an impressive range of colors, effects, gloss levels, surface designs, and surface embossing, we will satisfy your individual requirements.

Overview of all features

1. Does not contain plasticizers (for special products).
2. Free from heavy metals.
3. Resistant to stains.
4. Scratch and wear resistance by special coating.
5. Light fast and UV resistance.
6. High elasticity and toughness.
7. Excellent embossing stability.
8. Primer or corona (for PP foils) possible.

ECOTECHTURE

3D Foil

1. Perfect solutions for every area of application

3D foils are suitable for difficult profile geometries with the smallest manufacturing tolerances and offer versatile application options for furniture fronts, furniture elements, and interior doors.

Our 3D hard foils stand out with the highest visual consistency, excellent processing properties and functional characteristics as well as extreme durability. All 3D foils are free from softeners, heavy metals, and other impurities that are dangerous to health.

2. 3D Applications

Our 3D foils are used for the manufacture of kitchen, bedroom and bathroom furniture components.

The surface of our 3D foils is coated with a scratch-resistant lacquer that protects the material in use and helps withstand wear and tear. The back of the film is coated with a special primer to promote a durable and lasting bond.

The primer has been specifically developed to be compatible with the world's leading adhesive systems.

Our 3D foils are supplied as decorative surfacing for lamination to MDF using a thermoforming process.

Designers have the flexibility to combine these materials to produce beautiful furniture and create stunning interior projects. With our limitless possibilities, we also offer innovative solutions for retail interiors, hospitality areas and office spaces.

LVS

FEATURES

1. EMT™ Core SOUNDPROTEC technology with a more silent noise absorption

LVS has a shock absorption of approximately 1.4 times as much as the floor. The dense cushion layer with EMT™ Core-5D absorbs the shocks and provides a great sense of walking.

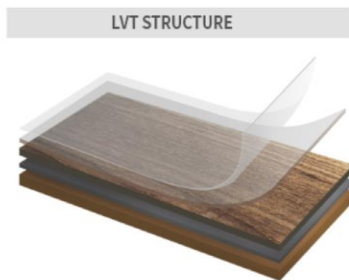

2. EPT™ Shield & EMT™ Core Technology

EMT™ Core – a more robust multilayer method

- EMT™ Core structure is strong for stamping with solid product durability, and excellent floor stability for good construction.
- The thickness of the product remains uniform and does not cause a difference

EPT™ Shield – safer premium natural matte coating

- NO phthalate plasticizer! Heavy metal content Zero!
- Eco-friendly certified flooring materials using eco-friendly plasticizer
- A flooring material that prevents the growth of fungi, which is more hygienic and clean.
- Slip resistant floor 1.5 times better than plywood floor/steel floor.

EPT™ Shield

- Antibacterial PU Coating with Skid Resistant
- Design protection upper layer

EMT™ Core-5D

- HD design printing layer
- G/F measurement stable layer
- High elastic cushion layer

SPECIFICATION

LVS 1.8T	LVS 2.2T	LVS 3.2T	LVS 4.5T
Thickness 1.8T	Thickness 2.2T	Thickness 3.2T	Thickness 4.5T
Width : 1.83M	Width : 1.83M	Width : 1.83M	Width : 1.83M
Length : 35M / Roll	Length : 30M / Roll	Length : 23M / Roll	Length : 18M / Roll

USAGE

Kindergarten, School, general housing / Apartment living room / rooms / multipurpose / religious facilities etc.

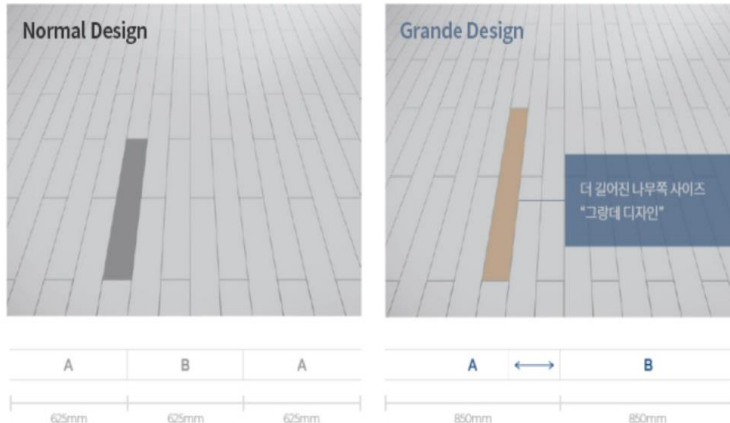

3. A more original and more natural design

More original design

- Various natural material designs, including terrazzo designs, include herringbone wood, ceramic tiles, and Bianco Carrara

More natural, wooden floor-like 'grand design'

- Longer tree-side design allows for a cooler space.

5. A more hygienic, anti- fungal breeding treatment

A more hygienic and clean anti- fungal breeding flooring material because fungus does not grow

Mold Formation on Specimen (Class 1: Below 10%)

Plain Floor

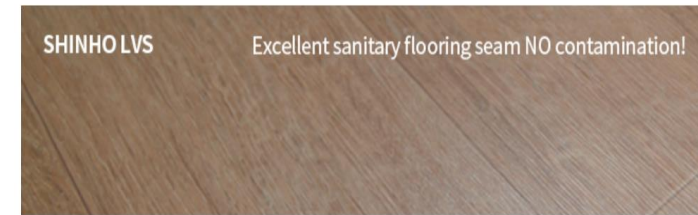

Mold does not grow

SHINHO LVS+

4. Cleaning and maintenance made easier

Sewing anti-pollution flooring material that is easy to clean and maintain with no fear of foreign substances

6. Slip Test Results

What is slip resistance? A flooring material with non-slip surface coating to ensure stability. The higher the slip resistance factor, the less slippery
